FOCUS

My research develops a **dynamical-systems and stochastic-process foundation for intelligence**, using it both to design new learning algorithms and architectures (*dynamical AI*) and to build AI that understands, predicts, and controls the dynamical world (*AI for dynamics*). I am especially drawn to **bio-inspired and physically-grounded computation**: architectures derived from how biological neural systems learn, and learning machines implementable in non-von Neumann physical substrates rather than only digital hardware. This endeavor connects foundational theory to modern architectures (e.g., transformers, diffusion models, SSMs, RNNs, Reservoir Computers, and world models) and to the neuroscience of how brains represent and forecast the dynamical world.

EMPLOYMENT & EDUCATION & INVITED VISITS

Allen Institute	Seattle, WA
Scientist II	2021 – present
Focus: designing AI that understands the dynamical world; designing dynamical AI; bio-inspired AI; dynamical system theory of learning and intelligence.	
Santa Fe Institute	Santa Fe, NM
Invited Speaker and Visiting Scientist	2026 May
Host: Yuanzhao Zhang	
Focus: Two underlying principles for sequential prediction from recurrent models and transformers.	
University of Pennsylvania, School of Engineering and Applied Science	Philadelphia, PA
Postdoctoral Researcher	2017 – 2021
Department of Bioengineering	
Supervisor: Dr. Danielle S. Bassett	
Focus: artificial intelligence; nonlinear dynamical systems; cognitive computational neuroscience.	
University of Maryland, Institute for Physical Science and Technology	College Park, MD
Ph.D. in Chemical Physics	2011 – 2017
Supervisor: Dr. Edward Ott	
Dissertation: “Dynamics of large systems of nonlinearly evolving units”	
Tsinghua University, Department of Physics	Beijing, China
Research Assistant	2010 – 2011
Supervisor: Prof. Yueheng Lan	
Focus: nonlinear dynamical systems.	
Shandong Normal University, School of Physics and Electronics	Shandong, China
B.S. in Physics	2006 – 2010

PRESENTATIONS

Invited Talks

- | | |
|--|------|
| "Synchronize or Hop: Two Mechanisms for Predicting the Dynamical World in Modern ML Models." | 2026 |
| Santa Fe Institute, Santa Fe, New Mexico | |
| "How recurrent neural networks infer dynamical models from data for prediction, inference, and source separation." | 2023 |
| APS March Meeting, Las Vegas, Nevada | |
| "Invertible Generalized Synchronization: A General Principle for Dynamical Learning in Neural Networks" | 2021 |
| Seminar at the Los Alamos National Laboratory's Advanced Network Science Initiative | |
| "Invertible Generalized Synchronization: A General Principle for Dynamical Learning in Neural Networks" | 2021 |
| Seminar at the Lanzhou Center for Theoretical Physics, Virtual | |
| "A putative mechanism for implicit learning in biological and artificial neural systems" | 2019 |
| Applied Dynamics Seminar, University of Maryland, College Park, MD | |

“Structural universality and Hebbian-like learning in an optimal context integration network” Summer Workshop on the Dynamics Brain, Friday Harbor, WA	2017
“Toward a theory of reservoir computing prediction” Applied Dynamics Seminar, University of Maryland, College Park, MD	2017
“Can topologically forbidden interchange of energy surfaces occur under slow variation of a Hamiltonian?” Informal Statistical Physics Seminar, IPST, University of Maryland, College Park, MD	2015

Conference Talks

“A First-Principles Methods for Learning Dynamics from Non-temporal Data” Cell Modeling in Space and Time, Cold Spring Harbor Laboratory (CSHL), NY	2026
“Inferring the Time-Averaged Jacobian Matrix of Wilson-Cowan Model with Machine Learning Method” SIAM Conference on Applications of Dynamical Systems (DS21), Online	2021
“Chaotic source separation solved by a tank of water through invertible generalized synchronization” APS March Meeting, Denver, CO	2020
“Why do reservoir computing networks predict chaotic systems so well” APS March Meeting, New Orleans, LA	2017
“Inhibitory neurons promote robust critical firing dynamics in networks of integrate-and-fire neurons” Dynamics Day, Silver Spring, MD	2017

Award-Winning Posters

“Resynchronization of circadian oscillators and the east-west asymmetry of jet-lag” 1 st prize/1 st place, IPST Spring Banquet, University of Maryland, College Park, MD	2016
---	------

TEACHING EXPERIENCE

Students Advised, Allen Institute, Seattle, WA

Harshil Sharma, Undergrad @ University of Washington	2023 – Present
Calvin Yeung, PhD Student, Math and Computer Science @ UC Irvin Topics: The role of temporal complexity in neuronal computations	Summer 2023
Rachel Ding, Undergrad, Computation and Neural Systems @ Caltech Topics: Modeling single neuron dynamics using electrophysiological data	Summer 2022

Students Advised, University of Pennsylvania, Philadelphia, PA

Jason Z. Kim, PhD Student of Bioengineering Topics: reservoir computing; nonlinear dynamical systems and chaos	2017 – 2020
William Qian, Undergraduate Student of Physics and Computer Science Topic: path-dependent dynamics in networks of oscillators	2019 – 2020

Lindsay M. Smith, Undergraduate Student of Physics Topic: dynamical capacity of reservoir computers	2021 – 2022
Students Advised , University of Maryland, College Park, MD	
Steven Lee, Summer Undergraduate Student of Physics and Math Topic: modeling the dynamics of jet-lag recovery.	Summer ‘15
Kevin Klein-Cardena, Summer Undergraduate Student of Math Topic: modeling the dynamics of jet-lag recovery.	Summer ‘15
Teaching Assistant , University of Maryland, College Park, MD	
Introduction to Statistical Thermodynamics, Department of Physics	Fall ‘11
Principles of Modern Physics, Department of Physics	Fall ‘11
Classical Mechanics, Department of Physics	Spring ‘12
Differential Equations for Scientists and Engineers, Department of Mathematics	Fall ‘12
Applied Probability and Statistics I, Department of Mathematics	Spring ‘13
Chaotic Dynamics, Department of Physics	Fall ‘14
Teaching Assistant , Tsinghua University, Beijing, China	
Nonlinear Dynamics and Chaos, Department of Physics	Fall ‘10

HONORS AND AWARDS

Most downloaded and cited articles in CHAOS	2018
Most downloaded articles in CHAOS	2017
Best in Show Award, Summer Workshop on the Dynamic Brain, Friday Harbor, WA	2017
Travel Award, Dynamics Day, Silver Spring, MD	2017
1st Place Poster Prize, IPST Spring Banquet, University of Maryland, College Park, MD	2016
Merit Fellowship Award, University of Maryland, College Park, MD	2013
Dean’s Fellowship Award, University of Maryland, College Park, MD	2011
Second Prize in Chinese National Challenge Cup Technology Competition, Shandong, China	2009
