Zhixin Lu, Ph.D.

Prepared: October 8, 2026

Scientist @ Allen Institute

615 Westlake Ave North, Seattle, WA 98109

zhixin.lu@alleninstitute.org | Personal Website | Google Scholar

Focus

My research aims to **build intelligent dynamical systems**. I connect *dynamics for AI*, using dynamical principles to understand and build intelligent computation, with *AI for dynamics*, developing methods to infer hidden states and dynamical laws from observations. I study how evolving states represent, retain, and transform information, and how geometry and stability shape the capacity to remember, infer, generate, and learn. **Physical AI and learning** are central interests: how the physics of a system shapes its computational capabilities, robustness, and energy efficiency. This program brings together nonlinear dynamics, stochastic processes, machine learning, and neuroscience.

Employment, Education & Invited Visits

Allen Institute, Seattle, WA — Scientist II **2021 – present**

Designing AI that understands the dynamical world; designing dynamical AI; bio-inspired AI; dynamical-systems theory of learning and intelligence.

Santa Fe Institute, Santa Fe, NM — Invited Speaker & Visiting Scientist **May 2026**

Host: Yuanzhao Zhang. Two underlying principles for sequential prediction from recurrent models and transformers.

University of Pennsylvania, Philadelphia, PA — Postdoctoral Researcher, Dept. of Bioengineering **2017 – 2021**

Supervisor: Dr. Danielle S. Bassett. Artificial intelligence; nonlinear dynamical systems; cognitive computational neuroscience.

University of Maryland, College Park, MD — Ph.D. in Chemical Physics (IPST) **2011 – 2017**

Supervisor: Dr. Edward Ott. Dissertation: "Dynamics of large systems of nonlinearly evolving units."

Tsinghua University, Beijing, China — Research Assistant, Dept. of Physics **2010 – 2011**

Supervisor: Prof. Yueheng Lan. Nonlinear dynamical systems.

Shandong Normal University, Shandong, China — B.S. in Physics **2006 – 2010**

Presentations

Invited Talks

"Discovering Stochastic Dynamics from Snapshots without Density or Score Estimation." Biological Physics & Physical Biology Seminar — **Oct. 2, 2026**

"Synchronize or Hop: Two Mechanisms for Predicting the Dynamical World in Modern ML Models." Santa Fe Institute, Santa Fe, NM — **2026**

"How recurrent neural networks infer dynamical models from data for prediction, inference, and source separation." APS March Meeting, Las Vegas, NV — **2023**

"Invertible Generalized Synchronization: A General Principle for Dynamical Learning in Neural Networks." Advanced Network Science Initiative, Los Alamos National Laboratory — **2021**

"Invertible Generalized Synchronization: A General Principle for Dynamical Learning in Neural Networks." Lanzhou Center for Theoretical Physics (Virtual) **2021**

"A putative mechanism for implicit learning in biological and artificial neural systems." Applied Dynamics Seminar, University of Maryland, College Park, MD **2019**

"Structural universality and Hebbian-like learning in an optimal context integration network." Summer Workshop on the Dynamic Brain, Friday Harbor, WA **2017**

"Toward a theory of reservoir computing prediction." Applied Dynamics Seminar, University of Maryland, College Park, MD **2017**

"Can topologically forbidden interchange of energy surfaces occur under slow variation of a Hamiltonian?" Informal Statistical Physics Seminar, IPST, University of Maryland, College Park, MD **2015**

Conference Talks

"Transformer Hops: A Geometric View of How Attention Computes." NeuroAI, Seattle, WA **2026**

"A First-Principles Method for Learning Dynamics from Non-temporal Data." Cell Modeling in Space and Time, Cold Spring Harbor Laboratory (CSHL), NY **2026**

"Inferring the Time-Averaged Jacobian Matrix of the Wilson-Cowan Model with a Machine Learning Method." SIAM Conference on Applications of Dynamical Systems (DS21), Online **2021**

"Chaotic source separation solved by a tank of water through invertible generalized synchronization." APS March Meeting, Denver, CO **2020**

"Why do reservoir computing networks predict chaotic systems so well." APS March Meeting, New Orleans, LA **2017**

"Inhibitory neurons promote robust critical firing dynamics in networks of integrate-and-fire neurons." Dynamics Day, Silver Spring, MD **2017**

Award-Winning Posters

"Resynchronization of circadian oscillators and the east-west asymmetry of jet-lag." 1st prize, IPST Spring Banquet, University of Maryland, College Park, MD **2016**

Teaching Experience

Students Advised — Allen Institute, Seattle, WA

Harshil Sharma, Undergraduate @ University of Washington **2023 – present**

Calvin Yeung, Ph.D. Student, Math & Computer Science @ UC Irvine. *The role of temporal complexity in neuronal computations.* **Summer 2023**

Rachel Ding, Undergraduate, Computation & Neural Systems @ Caltech. *Modeling single neuron dynamics using electrophysiological data.* **Summer 2022**

Students Advised — University of Pennsylvania, Philadelphia, PA

Jason Z. Kim, Ph.D. Student of Bioengineering. *Reservoir computing; nonlinear dynamical systems and chaos.* **2017 – 2020**

William Qian, Undergraduate of Physics & Computer Science. *Path-dependent dynamics in networks of oscillators.* **2019 – 2020**

Lindsay M. Smith, Undergraduate of Physics. *Dynamical capacity of reservoir computers.* **2021 – 2022**

Students Advised — University of Maryland, College Park, MD

Steven Lee, Summer Undergraduate of Physics & Math. *Modeling the dynamics of jet-lag recovery.* **Summer 2015**

Kevin Klein-Cardeña, Summer Undergraduate of Math. *Modeling the dynamics of jet-lag recovery.* **Summer 2015**

Teaching Assistant — University of Maryland, College Park, MD (2011 – 2017)

Introduction to Statistical Thermodynamics, Dept. of Physics **Fall 2011**

Principles of Modern Physics, Dept. of Physics **Fall 2011**

Classical Mechanics, Dept. of Physics **Spring 2012**

Differential Equations for Scientists and Engineers, Dept. of Mathematics **Fall 2012**

Applied Probability and Statistics I, Dept. of Mathematics **Spring 2013**

Chaotic Dynamics, Dept. of Physics **Fall 2014**

Teaching Assistant — Tsinghua University, Beijing, China (2010 – 2011)

Nonlinear Dynamics and Chaos, Dept. of Physics **Fall 2010**

Honors & Awards

Most downloaded and cited articles in *Chaos* **2018**

Most downloaded articles in *Chaos* **2017**

Best in Show Award, Summer Workshop on the Dynamic Brain, Friday Harbor, WA **2017**

Travel Award, Dynamics Day, Silver Spring, MD **2017**

1st Place Poster Prize, IPST Spring Banquet, University of Maryland, College Park, MD **2016**

Merit Fellowship Award, University of Maryland, College Park, MD **2013**

Dean's Fellowship Award, University of Maryland, College Park, MD **2011**

Second Prize, Chinese National Challenge Cup Technology Competition, Shandong, China **2009**
